Introducing the Quote MTF Fee Cap Promotion

Subscribers who sign in 2011 will enjoy a €14,000 fee cap until 2012

The Best MTF Deal Just Got Better

What do you get when you combine cutting-edge technology with an innovative fee model? An MTF ideal for participants like you. Quote MTF is recognized for its low-latency technology, no rebate commercial model and a floor-breaking 0.14bps fee for aggressive trading. Now we're going a step further and setting a new benchmark for value in European equities trading: for an entire year, pay €14,000 (or less) for all liquidity removing orders and strategies. Best of all—through the successful take up of our new equity plan, which rewards passive liquidity providers proportionally to their executed volume—you can be assured that liquidity will be available on demand.

A High Value Model for Active Participants

Whether you serve institutional or retail customers, need to hedge positions, or run high-frequency strategies, Quote MTF's fee cap model offers a unique edge to help you compete and realize greater value. Here are just a few ways to profit (contact us to hear more ideas):

Participant	Goal	Fee Cap Benefits
Institutional Broker	Reduce Implementation Shortfall Achieve higher margin with blended rates.	Enables more aggressive trading while reducing timing risk.
Online Retail Broker	Attract and retain clients	Creates opportunities for a number of promotional programs such as all-in pricing.
Prop Firm	Reduce fees and launch new strategies	Retain greater percentage of gross profits and enable more cost-sensitive arbitrage strategies.
CFD Market Making Firm	Hedge accurately and effectively with minimal cost	Save on immediate fills

No Hidden Costs

At Quote MTF, we're proud to offer our customers cutting-edge technology with clear, simple business models. As a Subscriber, you'll enjoy membership, market data, FIX ports, and connectivity *at no additional charge*. What you see is truly what you get.
